

Supporting innovation – designing the future ...

... in Germany and Europe.

atene KOM is the reliable partner and trailblazer for public funding. Find out more about our projects!

atene KOM

As an experienced partner, atene KOM supports the public sector in the development and implementation of projects in the areas of digitalisation, energy, mobility, health and education.

Together with municipalities, rural districts and companies, we develop the infrastructure of the future. Our goal is to strengthen the regions: With partners across Germany and Europe, we are working on projects for the future, focusing on areas such as rural digitalisation. We are developing mobility concepts for local and long-distance transit and smart strategies for accelerating the clean energy transformation.

In doing so, we support our partners with over 400 experts in the areas of administration, IT, law, economics, education, communication, urban/regional development and geo-information systems with tailor-made solutions for complex tasks.

What is most important for us is to be close to our customers: We are present at eight locations across Germany, as well as in Brussels and Kyiv.

TOP 100

Prize-winning innovation

atene KOM has been awarded the TOP 100 seal for 2021, an important recognition of future-oriented innovation management. With that, we belong to the most innovative mid-sized companies in Germany.

Our Competencies

Regional Development

We support regions and municipalities in the development of future-proof concepts, especially in the areas of:

- Expanding the gigabit internet
- Local heating networks as part of the clean energy transformation
- Regional mobility concepts
- Digital education
- Implementation of the OZG [Onlinezugangsgesetz (Online Access Law)]
- Modernisation of e-government and administration

Project Management

Good organisation is pivotal for the success of a project. This includes milestone and resource planning, financial administration, progress reports, project meetings, internal and external communication and project monitoring/evaluation – optimised and proven process chains help to manage and conclude wide-ranging tasks.

European Networks

Together with institutions from all over Europe, we implement numerous projects. This provides us with the ideal pre-requisites for exchanging experiences with partners from business, administration, politics and the sciences – not least, to identify innovative solutions for local challenges.

Project Development

Our core competencies are structured project development and network development with partners, both domestic and foreign – from the idea to the goal. Close and individualised contact is important to us: Thanks to our widespread regional offices, we are easy to reach for our customers – as are our customers for us.

Public Relations

Effective and efficient public relations work is an essential part of successful project management. Whether it be through social media engagement, working with the press or the implementation of events, we specialise in project PR and support you with our own graphics and PR activities.

atene KOM Academy

The future is digital – and whoever wants to have a hand in shaping it must confront the challenges of digitalisation. As experienced partners, we are always prepared to support the public sector in developing the necessary skills.

Our academy supports the public sector, as well as private sector companies involved in public administration, in digital transformation processes across the areas of infrastructure, technology and education. With our practical, customised educational offer, we provide the necessary knowledge and practical skills to successfully participate in digitalisation.

Competency Center Digital Education

Education is experiencing a push towards digitalisation. As a strategic partner, we support schools and school management agencies in the development of long-term digital educational concepts and sustainable technical infrastructure.

In close collaboration with our partners, we initiate, support and shape digital strategies required for modern education and provide support with planning technical pre-requisites for future-proof digital infrastructure. We also support school management agencies as part of the DigitalPakt Schule [Digital Pact for Schools] throughout the entire subsidy application process.

Expertise

In broadband development, municipalities are often confronted by complex technological, organisational and financial decisions. In our loose-leaf collection, thematic experts provide insights into the legal, economic and technical foundations of broadband development for municipalities.

The contents of the eight modules are continuously being updated for legal, technical and financial changes.

Subsidy Advice

What subsidy options are available for a new project? The ateneKOM Funds mobile app provides information on subsidies at the state, federal and EU levels, in addition to informing users about relevant events. Once you have identified an applicable subsidy call, you can request an initial consultation with an atene KOM adviser.

The “atene KOM Funds” mobile app is available through the Apple App Store and Google Play.
